# 2x2 Matrix: Axis

## Frequency of Use

How frequently will the agent use your dataset in their work?

## Importance of Review

How important is the agent's review, approval, or feedback for the dataset's success?

TIE BREAKER

## Impact on Agent

How might the agent be impacted once your dataset is used in production?

# Priority Matrix

Brainstorm and select the top agents of your Data Card. These are the primary, intended audience for your dataset.

- Agents who use datasets in production represent only a subset of agents who engage with Data Cards
- Agents can affect launches, determine use, or represent people affected by dataset application

#datacardsplaybook

# Decide on the top 10 agents of your Data Card

**Step 1:** Individually brainstorm as many agents as possible

**Step 2:** Plot these on the priority matrix

**Step 3:** As a group, review the matrix and rank your agents by importance

Use the third axis, Impact on Agent to break any ties

**Step 4:** Transfer results to the Agents Brainstorm tab in your Activity Tracker

These agents represent the audience of your Data Card.  
Subsequent activities will focus on them.

agent				

**Brainstorm agents: Write one agent per box.**

Agents = have the power to determine use and access.

Stakeholders who use and evaluate data sets and their corresponding Data Cards. They can make decisions about the use of your dataset, which can be based solely on insights provided in dataset documentation.

**Agents** are the intended users of Data Cards, and they may not interact with the dataset itself. They:

- **Manage complexity:** improve or create processes, set technical direction
- **Uphold accountability:** assess risk, responsible use of datasets
- **Complete action items:** select features to integrate or engineer, calculate tradeoffs and deploy
- **Other actions:** preserve or explore data history, learning and education

Copy & paste agents in the appropriate quadrant

REVIEW IS IMPORTANT  
USES DATASET INFREQUENTLY

REVIEW IS IMPORTANT  
USES DATASET FREQUENTLY

REVIEW NOT IMPORTANT  
USES DATASET INFREQUENTLY

REVIEW NOT IMPORTANT  
USES DATASET FREQUENTLY

Activity  
Priority Matrix

Copy & paste agents above or below the axis to break ties

# Next steps

## OUTCOMES

—

A list of agents who are important to the success of your dataset, and are the intended readers of your Data Card.

## FOLLOW UP

—

- Update your Activity Tracker
- Next: Align on Agents
